

GUESSTIMATE

AVERAGE HOURS SPENT IN THE ACADEMIC BLOCK BY A FD STUDENT IN A DAY

Assumptions -

- Total FD students = 4800
- 25 hours of lectures/labs/tuts for all years
- All the students are in the campus for 9 months a year.
- Lectures/tuts/labs don't happen on sundays

1) Attendance in classes-

Year	Total Students	Attendance(%)	Net Attendance
1	1200	75%	900
2	1200	40%	480
3	1100	25%	275
4	1000	25%	250
5	300	25%	75
		NET TOTAL	1980

2)-How students spend their time in academic block-

- Lectures/tutorials/labs = 25 hr/week
- 15% of students go to the library = 10 hr/week

- 30% of the students go the cafeteria regularly = 1hr /week
- 40% of the students visit for extracurriculars (Workshops,club meetings,etc.) = 2.5hr/week

3)-Hours spent in the academic block (all students combined)-

- **Lectures-**
 $1980 \times 25 = 49500 \text{ hr/week} \Rightarrow 8250 \text{ hr/day}$
- **Library-**
 $15\% \text{ of } 4800 = 720 \text{ students}$
 $720 \times 10 = 7200 \text{ hr/week} \Rightarrow 1028 \text{ hr/day}$
- **Cafeteria-**
 $30\% \text{ of } 4800 = 1440 \text{ students}$
 $1440 \times 1 = 1440 \text{ hr/week} \Rightarrow 206 \text{ hr/day}$
- **Extracurriculars -**
 $40\% \text{ of } 4800 = 1920 \text{ students}$
 $1920 \times 2.5 = 4800 \text{ hr/week} \Rightarrow 686 \text{ hr/day}$

TOTAL HOURS = $8250 + 1028 + 206 + 686 = 10170 \text{ hr/day}$

4)-Average hours spent by a BITSian(FD) in academic block per day -

Average hours for 1 student = Total hours / 4800
 $= 10170/4800 = \underline{2.11 \text{ hr} \sim 2 \text{ hr}}$
